-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Election/Restrictions

1. Applicant's election of Group I, claims 1 – 27 and the species GDF-5 in the reply filed on March 31, 2009 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

Claims 28 – 34 are withdrawn as being drawn to non-elected subject matter. Claims 1 – 27 have been considered on the merits insofar as they read on the elected species.

Claim Objections

2. Claims 9 – 13, 19 – 21, 24 – 25 and 27 are objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim can not depend on a multiple dependent claim. See MPEP § 608.01(n). Accordingly, the claims have not been further treated on the merits.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

5. Claims 1 – 27 are rejected under 35 U.S.C. 103(a) as being unpatentable over Chu et al. (US 5258029).

Chu teaches methods for producing devices wherein a stress bearing member is coated with a TGF beta cofactor (abstract). The stress bearing member may be metal or metal alloys commonly used in the art such as titanium or titanium alloys (col.1, line 30-40, col.3), and the TGF beta may be combined with osteogenically active proteins (col.2-3). Although the reference does not teach all of the claimed metal alloys or specific osteoinductive protein, each of the claimed alloys and proteins were well known and used in the art for the claimed purpose as suggested by Chu. In addition, while the reference does not teach each of the claimed limitations under which the device is made, they are all commonly practiced steps in the art and would have been parameters practiced by one of ordinary skill in the art. Moreover, absent evidence to the contrary, the claimed limitations do not appear to impart any unexpected benefit or advantage to the resulting device, outside of what one in the art would expect in practicing the method of Chu.
